

Choices

Turn Interest into Opportunity

While you may not know what you want to do after high school, you can make sure that you have as many **choices** as possible once you graduate. Completing A-G coursework in addition to exploring your **interests** through CTE and AP classes can make all the difference.

A-G

COLLEGE CHOICES

Keep your opportunities open; complete a well-rounded set of courses (listed as A-G) which are required to be accepted into UC or CSU colleges.

CTE

JOB CHOICES

Be a "completer"; explore your interests, get hands-on experience, earn a certificate and complete a Career and Technical Education course pathway.

AP

COURSE CHOICES

Save money on tuition; earn free college credits and gain invaluable experience with college-level courses by enrolling in Advanced Placement classes.

Make high school more than just getting your diploma.
